Chapter overview

The California Eta chapter at San Jose State University was founded in March of 1964. Today, California Eta chapter represents the Davidson College of Engineering’s top students from all engineering departments. The chapter works to provide members with a rich experience, to make available tools for students to succeed, and to do projects to improve our community. Our chapter has restarted in 2007 and has grown quite significantly. We started with an officer board with 4 members, and for this year we had up to 11 officers.

DESCRIPTION:

I. General Description:
Hiked along a scenic trek around the mountains at Sanborn County Park in Saratoga, CA for a social event with the TBP candidates and officers along with our TBP advisor Professor Hsu from the Electrical Engineering Department from SJSU. The approximate time of arrival was 9:30 am, and the approximate time of departure was 1:30 pm. The length of the hike was about six miles.

II. Purpose & Relationship to Objectives of TBP:
The purpose of this hike was to connect candidates with other members, candidates, officers, and one of our TBP advisor Professor Hsu. This event also provided an opportunity for the candidates to earn event points and make new friends.

III. Organization & Administration: (in conjunction with another group?)
Yes  X  No
Transportation was arranged as carpool.

IV. Cost & Personnel Requirements:
The parking cost was $30.

V. Special Problems:
Some members and candidates got lost or went to the wrong side of the park and we wasted about 30 minutes.

VI. Overall Evaluation/Results (Be Specific):
The hike was very successful, as it allowed officers to connect with new candidates to determine their personality and everyone enjoyed the experience.

Organizing: 1
Participating: 1

DESCRIPTION:

I. General Description:
Spartan Hyperloop was established as an SJSU student organization in 2015 to contribute to the expedited development of Hyperloop from concept to reality by building proof-of-concept prototypes and producing innovative engineering designs to solve Hyperloop problems. For Spartan Hyperloop 1.0, the team has been working on designing and building a sub-scale, functional prototype of the Hyperloop Pod and Tube at SJSU. The goal of this first iteration of the project is to establish a proof-of-concept of Hyperloop as well as test the SH 1.0 Pod’s Levitation, Aerodynamics and Control Systems.

II. Purpose & Relationship to Objectives of TBP:
This meeting encouraged members of TBP to work on Hyperloop as a project (not TBP sponsored, but affiliated) because TBP represents the top scholars of the engineering program at SJSU.

III. Organization & Administration: (in conjunction with another group?)
